DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 2, 5-10, 19-21, and 26-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,592,606. Although the conflicting claims are not identical, they are not patentably distinct from each other because the relatively subject matter claimed in the instant application clearly would have been obvious in view of the relatively subject matter of the patent claims such as a guide wire; an expandable cage assembly being attached to the distal end of the guide wire; filter material secured to the expandable cage assembly; and further at least one discrete hinge located on the guide wire.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

Art Unit: 3731

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1, 2, 5-10, 19-21, and 26-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Broome et al. (U.S. 6,152,946).

Broome et al shows in figures 1-8, a guide wire (32) is considered of having at least one discrete hinge proximal to the expandable cage assembly (24) and another hinge located distal to the expandable cage assembly (24) to allow the expandable cage assembly to freely articulate on the guide wire (32), due to the guide wire (32) flexibility to guide the filter device through the vasculature of a patient; the expandable cage assembly (24) connected to filter material (20), wherein the filter material (20) comprises a plurality of openings (40), wherein the guide wire (32) includes a coiled tip (fig.9) at the distal end; and wherein the expandable cage assembly comprises a plurality of struts (30) thereon.

Response to Arguments

Applicant's arguments filed 07/22/2005 have been fully considered but they are not persuasive. With respect to claims 1 and 26, the Examiner asserts that Broome patent is considered of having at least one discrete hinge located on the guide wire (32), which can be at any specific location on the guide wire (32) so that it is possible for a guide wire to pass through the vasculature. The Examiner disagrees with Applicant's

remarks and has maintained the grounds of rejection under 35 U.S.C. 102 (e) as being anticipated by Broome et al for the reasons as set forth in the above rejection.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
